

availability

the online vacancies calendar

FILL UP THOSE BLANK DATES

Whether you have one holiday property to let or one hundred, **availability** instantly presents your 'dates booked' and 'dates vacant' to the general public in a clear and easy way. **availability** is a bookings calendar for use on the web and in e-mail. With three months to a view, **availability** allows the reader to see at a glance if a holiday week is already taken. It's a great service and it works.

Look at the advantages of the **availability** calendar:

- promotes spare weeks at short notice
- reduces enquiries for weeks already booked
- shows when a short break is possible
- handles late cancellations – no problem
- stops you repeating yourself a hundred times

You can put the **availability** link anywhere – on your cottage's website, in e-mail messages and on listings with commercial websites. **availability** has one purpose – to make people aware of the dates that are booked and of those that aren't. Above all, **availability** saves time – for owners and enquirers alike.

availability is **FREE** to customers of participating web publishers and travel information services. You can either update **availability** yourself – it's easy – or you can phone in daily changes to **availability** staff, who will update the service for you during office hours.

To find out more about **availability** and how it operates, just call 0870 2414801. Or check how it works for yourself on a typical site – see Green Barn Cottages on www.gb cottages.co.uk
